

## **Merck Maximum Fair Price (MFP)**

### **Frequently Asked Questions**

**Q: How does Merck plan to effectuate the MFP?**

**A:** Merck intends to utilize the MTF payment module to effectuate the MFP for JANUVIA, subject to any new developments. Merck is committed to ensure accurate and timely effectuation for JANUVIA in the most efficient manner.

**Q: What calculation methodology will Merck use to determine dispensing entity reimbursement for JANUVIA?**

**A:** Consistent with CMS final guidance for IPAY2026 effectuation, Merck is aligned that for a product like JANUVIA, WAC is the most appropriate price to use to calculate SDRA in most instances. Specifically, methodology will be  $WAC - MFP = SDRA$  (standard default refund amount). Exceptions will exist where entities purchase at a discounted price, such as 340B. This methodology is subject to change.
